Reservations: RSVP no later than 4:00pm Tuesday 10/4 via an

Email to [Tricia King](#), Patricia.king@rockwell.com

Joe Runyon

**The Values and
Benefits of Home
and Commercial
Inspections**

This month's chapter program will give us the opportunity to learn more about the values and benefits of home and commercial inspections.

This program will give us reasons for thorough Real Estate Inspections that benefit buyers, sellers, agents, lenders and anyone involved in the transactions. Subject matter will include minor cosmetic issues that are easy to correct, issues that can be costly to correct, and life safety issues.

Joe Runyon was trained and qualified while serving in the US Navy on Nuclear Submarines in Electrical, Plumbing, HVAC, and other functioning systems.

After graduating from Bryan College, he has been involved in the Construction business since 1983, when he became a State of Tennessee Licensed General Contractor.

He has owned and been involved in Residential and Commercial Construction as an owner, designer, and project management in multiple businesses. Among them are: General Construction, HVAC, Asphalt Paving, Commercial Roofing, Swimming Pools, and Cabinets. He is well trained in Codes and Regulations.

He is an Advisory Member on the Board of the Vogel School of Engineering Bryan College, and serves as Commissioner and Secretary of the City of Dayton Planning and Zoning Commission. He has served as a BOG member and other offices in ASHRAE Tennessee Valley Chapter since 2012.

Professional Development Certificates (1 hour) will be provided after the webinar. The webinar should conclude by 1 pm

Membership Notes

ANNOUNCEMENTS:

- We are always looking for more great ideas of programs and speakers. Please feel free to suggest any topics you would like to learn about

2022-23 Chapter Programs

Good programs are what make the Chapter meetings a success. Last year your participation (attendance) was great. It is directly attributable to the quality of programs. Input is continually needed from everyone (both members and non-members) for topics (and potential presenters) that are of interest. Efforts will be made to address all needs (residential, commercial, nuclear, renewable, etc.), so do not be ashamed to ask.

Contact [Kay Thrasher](#) or any current Board member with suggestions.
